LOOK FOR THESE SIGNS TO HELP CHOOSE THE BEST ROUTE

Border crossing traffic management and information is a collaborative effort of NITTEC Members and Affiliates including the Niagara Falls Bridge Commission, Peace Bridge Authority, New York State Department of Transportation, New York State Thruway Authority, Ontario Ministry of Transportation, United States Customs and Border Protection and Canada Border Services Agency. Through the use of the NITTEC Traffic Operation Center all transportation related information and activities in the Niagara Frontier Region are collected and disseminated to the public through the media, web sites, highway advisory radio and displayed on message signs along the highway.

Niagara International Transportation Technology Coalition (NITTEC) is an organization comprised of fourteen agencies in Western New York and Southern Ontario. The mission of NITTEC is to improve mobility, reliability and safety on the regional bi-national multimodal transportation network through information sharing and coordinated management of operations. The Coalition was established to help you travel safely and efficiently. Reliable traveler information for personal and business decisions means less time spent in congested traffic resulting in less energy consumption and pollution.
